

Agentic AI

Capabilities Demonstration

Jay Nakagawa

Co-Executive Director, SAICI

THE NEXT ENTERPRISE SHIFT

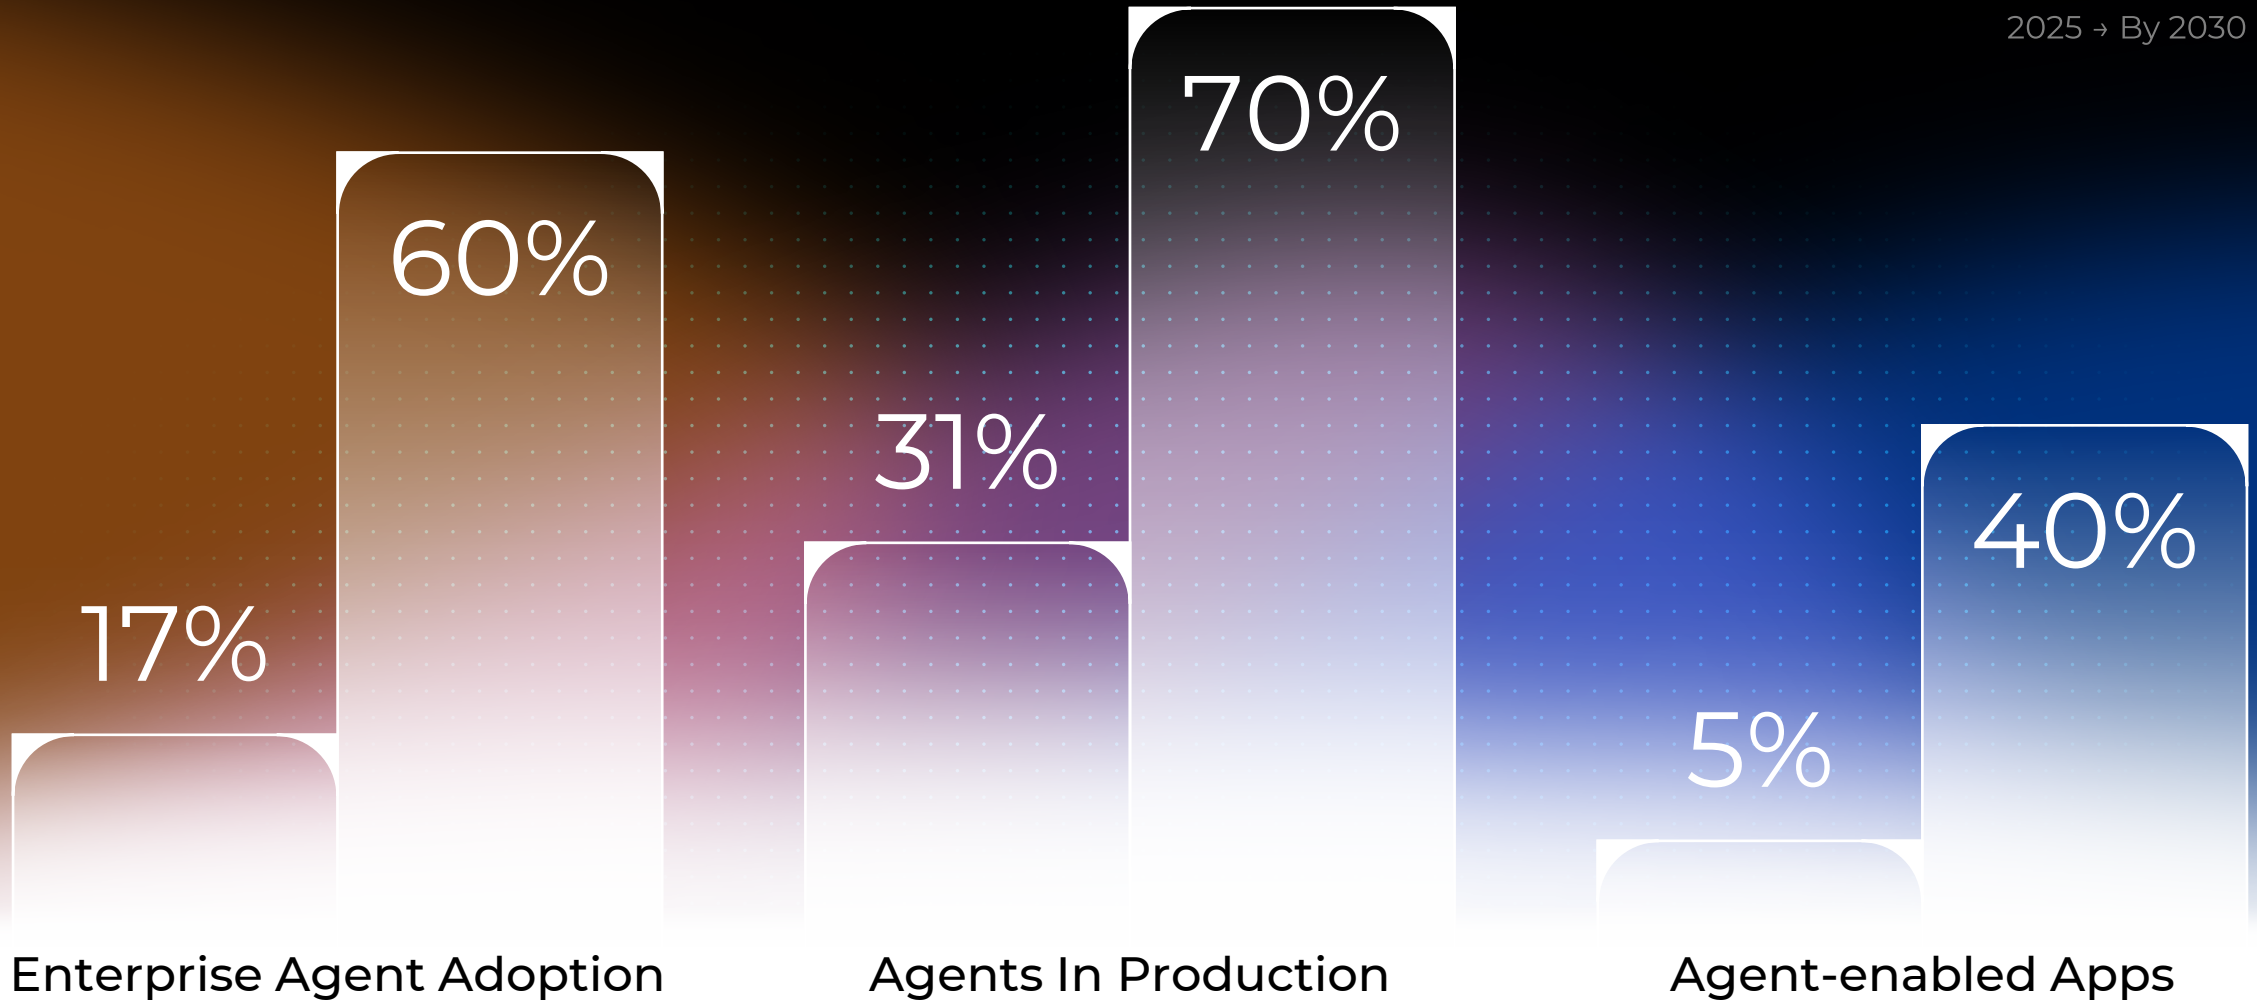

Don't build an AI pilot that
demos AI...

Build one that
demonstrates competitive
advantage.

THE INFLECTION POINT

Agent Adoption is Accelerating

2025 → By 2030

MATURITY MODEL

Autonomy, Earned Step By Step.

01

EXPERIMENT

Sandbox ideas and validate feasibility in isolated environments

02

PILOT

Demonstrate measurable value with one governed use case.

03

PRODUCTION

Operate reliably with monitoring, SLAs, and clear ownership.

04

SCALE

Reuse capabilities across teams through shared platforms and standards.

05

GOVERN

Govern enterprise-wide with continuous assurance, policy, and portfolio oversight.

READINESS ASSESSMENT

Can We Scale Agentic AI?

Rating <3 is a scaling blocker

DATA

4/5

PLATFORM

3/5

TALENT

2/5

RISK

4/5

PRIMARY BLOCKERS

Siloed enterprise data

Undefined data ownership

Disconnected systems

No shared agent platform

Skills gap

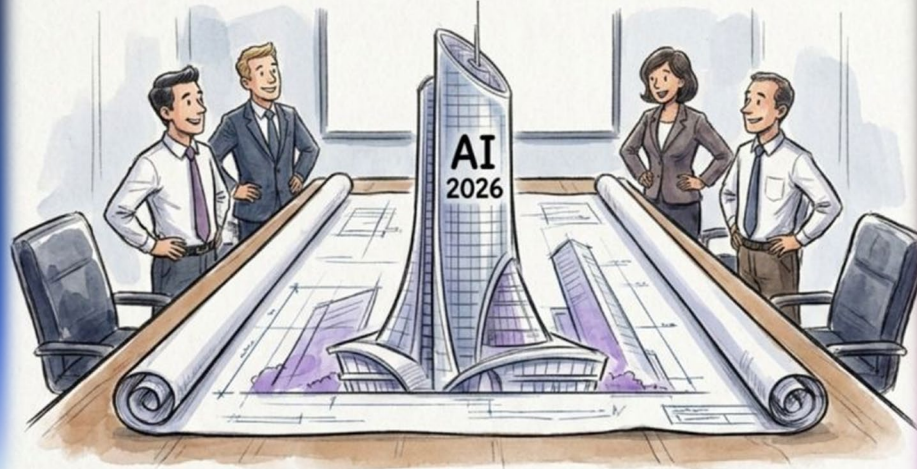

Low business adoption

Missing governance plan

Insufficient auditability

One of the Problems

THE STRATEGY

THE BUDGET

Blueprint for a tower. Budget for a shed.

Clear Goals

Every Enterprise Will Deploy AI

The Winners Will Govern It.
